

## MAIN AREAS OF ACTIVITIES OF BUSINESS

- Benchmarked ICT courses for students of all ages.
- Full suite of the curriculum software (CAPS aligned), with classroom themes and topics for pre-school, primary and high school learners.
- Minecraft, educational games and learning activities for kids.
- Essential, Orientation and Supplementary Digital Course for adult community.

## OUR BUSINESS APPROACH

Our courseware for e-Learner is unique in a number of ways:

### INTEGRATED

The e-Learner lessons not only teach ICT skills but also integrate current content thereby ensuring that lessons are interesting and relevant.

### FLEXIBLE

We are not prescriptive about the order or quantity of lessons that your child should receive. We always consider concepts and ICT skills level that are suitable for your child.

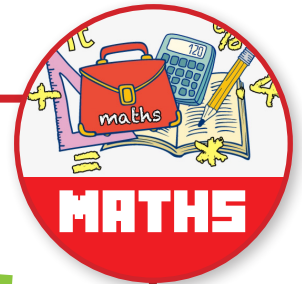

### COMPREHENSIVE

All the resources required to complete an e-Learner lesson are supplied including templates, saved web pages, website links and graphics.

### TRACKING AND REPORTING

Records of lessons completed and skills acquired are kept by the ICT Facilitator using the e-Learner Administration System and are available on request.

# COMPUTER SKILLS

## MAIN PRODUCTS AND SERVICES

### E-LEARNER CERTIFICATION

#### Learners:

These hands-on lessons take place after school hours at the Doze n Dream Computers 4 Kids Training Centre and cover South African school content (maths, English, Afrikaans, Social Studies, Sciences etc) as well as Digital Skills aimed at your child's academic level. Children will receive benchmarked certification from the e-Learner Foundation (South Africa) on completion of the course. The advantage of children attending these integrated or blended lessons are too numerous to be listed here but we are confident that the consolidation of completing classroom themes and topics as well as ICT skills will stand them in good stead for progressing through the academic stresses that our children currently find themselves in. Our courseware is also unique in that it incorporates lessons which promote Emotional Intelligence (EQ) in children – also a first for South Africa!

#### Adults:

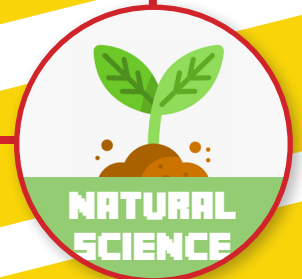

Courses offered to adults cover the seven units (Basic Concepts of IT, using computer in managing files, word processing, presentation, database, web browsing and emails, as part of the e-Learner Foundation certification programme BUT aimed at users who do not need or require high levelled international certification but who want some form of certification covering the basic Office suite.

### SCHOOL HOLIDAY WORKSHOPS

Fun school holiday workshops can be offered at all Doze n Dream Computers 4 Kids Training Centres. These workshops allow your children to attend structured and fun IT classes during the school holidays which gives them peace of mind knowing that they are being cared for BUT at the same time playing educational games, being creative and getting to know how to use the PC as a tool. The length and format of these great workshops are not standard – please contact our centre for further information or to make a booking for the next school holidays!

### PRE SCHOOLS, PRIMARY AND HIGH SCHOOL CLASSES

Doze n Dream Computers 4 Kids Training Centre can be mobile! Our staff can come to your pre-school, crèche or after care centres and offer IT classes to your learners in the comfort of your school using our specialized laptops. All activities are aligned to the National Curriculum Statement, are approved by various Education Departments and offer integration of classroom content and IT skills at its best – the ideal way to learn!
